

*A John Deere collector about to travel with part of his collection of John Deere tractors to the Manitoba Agricultural Museum to take part in the 180 Years of John Deere event presented by Enns Brothers. This event is going to take place at the Museum's annual festival, the Threshermen's Reunion and Stampede, which runs July 27 to July 30. As well as the John Deere pieces in the Museum's collection, outside collectors are bringing John Deere equipment to the event. The Reunion Chairman reports that an excellent selection of Deeres is expected at 180 Years of John Deere including two rare right hand exhaust Model Ds. Sharp eyed readers will have noticed that two of the Ds are equipped with the unusual tip toe and skelton rear wheel options. As well as 180 Years of John Deere, the Reunion features antique machinery demonstrations, machinery parade, heavy horses, a petting zoo for the kids, an evening rodeo and more. For more information on the Museum and the Reunion, google Manitoba Agricultural Museum to find the Museum's website which contains useful information for visitors.*
